

GWD

GRAPHIC WEB DESIGN

WEEK TWO - CSS LAB

WEEK 2 CSS LAB

Assignments

** For the 4 weeks in GWD please use the instructions as well as the rubric for details in regards to assignment requirements.

In this assignment you will learn CSS and how it communicates with HTML5 as well as how it styles the look of a webpage.

After following along with the demo you will create an HTML 5 page on your own using the provided copy and images. You will also create new styles for your page using CSS. The page you create should be about.html, using the copy and images provided.

Detailed instructions and requirements can be found below in the rubric.

Understand that this will be strict HTML and CSS. You should be using the code learned in the demo. If you wish to experiment with more CSS you may do so, however, be sure to adhere to the requirements in the rubric.

WEEK 2 CSS LAB

Assignments

** For the 4 weeks in GWD please use the instructions as well as the rubric for details in regards to assignment requirements.

Instructions

- Create a folder and use the following naming convention (FirstLast_CSSlab)
- Follow the tutorial video
- Read the rubric for specific HTML and CSS requirements
- Include the HTML and CSS files created in the video
- Include the about.html file styled that you create
- Include the images folder provided
- Compress /zip the folder resulting in the following naming convention (FirstLast_CSSlab.zip)

Once complete, upload the zipped folder for grading.

If you have questions please email me at jhendriks@fullsail.com.
